EXPLANATION TO INDEX

APPENDIX TO TABLE County Seats in full face type

• Money Order Post Office.

X Less than 100 population.
owns in Roman Type Post Offices

owns in *Italic* Type not Post Office

ital letters in middle column refer to location of county in which H. T. is located.

of County in which the Town is situated.
6 miles from

C means Center.

卷之三

ANALYSIS OF THE SYSTEM OF UNITED STATES LAND SURVEYS

COPYRIGHT, 1890.

METES AND BOUNDS.

Up to the time of the Revolutionary War, or until about the beginning of the present century, land, when parcelled out, and sold or granted, was described by "Metes and Bounds," and that system is still in existence in the following States, or in those portions of them which had been sold or granted when the present plan of surveys was adopted, viz.: New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, North and South Carolina, Georgia, Tennessee, Kentucky, Texas, and the six New England States. To describe land by "Metes and Bounds," is to have a known land-mark for a place of beginning, and then follow a line according to the compass-needle (or magnetic bearing), or the course of a stream, or track of an ancient highway. This plan has resulted in endless confusion and litigation, as land-marks decay and change, and it is a well-known fact that the compass-needle varies and does not always point due North.

As an example of this plan of dividing lands, the following description of a farm laid out by "Metes and Bounds," is given: "Beginning at a stone on the Bank of Doe River, at a point where the highway from A. to B. crosses said river (see point marked C. on Diagram 1); thence 40° North of West 100 rods to a large stump; thence 10° North of West 90 rods; thence 15° West of North 80 rods to an oak tree (see Witness Tree on Diagram 1); thence due East 150 rods to the highway; thence following the course of the highway 50 rods due North; thence 5° North of East 90 rods; thence 45° East of South 60 rods; thence 10° North of East 300 rods to the Doe River; thence following the course of the river Southwesterly to the place of beginning." This, which is a very simple and moderate description by "Metes and Bounds," would leave the boundaries of the farm as shown in Diagram 1.

MERIDIANS AND BASE LINES.

DIAGRAM 2.

THE present system of Governmental Land Surveys was adopted by Congress on the 7th of May, 1785. It has been in use ever since and is the legal method of describing and dividing lands. It is called the "Rectangular System," that is, all its distances and bearings are measured from two lines which are at right angles to each other, viz.:+. These two lines, from which the measurements are made, are the Principal Meridians, which run North and South, and the Base Lines, which run East and West. These Principal Meridians are established, with great accuracy, by astronomical observations. Each Principal Meridian has its Base Line, and these two lines form the basis or foundation for the surveys or measurement of all the lands within the territory which they control.

Diagram 2 shows all of the Principal Meridians and Base Lines in the central portion of the United States, and from it the territory governed by each Meridian and Base Line may be readily distinguished. Each Meridian and Base Line is marked with its proper number or name, as are also the Standard Parallels and guide (or auxiliary) Meridians.

Diagram 3 illustrates what is meant when this method is termed the "Rectangular System," and how the measurements are based on lines which run at right angles to each other. The heavy line running North and South (marked A. A.) represents the Principal Meridian, in this case the 5th Principal Meridian. The heavy line running East and West (marked B. B.) is the Base Line. These lines are used as the starting points or basis of all measurements or surveys made in territory controlled by the 5th Principal Meridian. The same fact applies to all other Principal Meridians and their Base Lines. Commencing at the Principal Meridian, at intervals of six miles, lines are run North and South, parallel to the Meridian. This plan is followed both East and West of the Meridian throughout the territory controlled by the Meridian.

UNITED STATES LAND SURVEYS.

These lines are termed "Range Lines." They divide the land into strips or divisions six miles wide, extending North and South, parallel with the Meridian. Each division is called a Range. Ranges are numbered from one upward, commencing at the Meridian; and their numbers are indicated by Roman characters. For instance, the first division (or first six miles) west of the Meridian is Range I. West; the next is Range II. West; then comes Range III. IV., V., VI., VII., and so on, until the territory governed by another Principal Meridian is reached. In the same manner the Ranges East of the Meridian are numbered, the words East or West being always used to indicate the direction from the Principal Meridian. See Diagram 3.

Commencing at the Base Line, at intervals of six miles, lines are run East and West parallel with the Base Line. These are designated as Township Lines. They divide the land into strips or divisions six miles wide, extending East and West, parallel with the Base Line. This plan is followed both North and South of the Base Line until the territory governed by another Principal Meridian and Base Line is reached. These divisions or Townships are numbered from one upward, both North and South of the Base Line, and their numbers are indicated by figures. For instance: The first six mile division North of the Base Line is Township 1 North; the next is Township 2 North; then comes Township 3, 4, 5, and 6, North, and so on. The same plan is followed South of the Base Line; the Townships being designated as Township 1 South, Township 2 South, and so on. The "North" or "South" (the initials N. or S. being generally used) indicates the direction from the Base Line. See Diagram 3.

These Township and Range Lines, crossing each other, as shown in Diagram 3, form squares, which are called "Townships" or "Government Townships," which are six miles square, or as nearly that as it is possible to make them. These Townships are a very important feature in locating or describing a piece of land. The location of a Government Township, however, is very readily found when the number of the Township and Range is given, by merely counting the number indicated from the Base Line and Principal Meridian. As an example of this, Township 8 North, Range 4, West of the 5th Principal Meridian, is at once located on the square marked \star on Diagram 3, by counting eight tiers north of the Base Line and 4 tiers west of the Meridian.

TOWNSHIPS OF LAND.

TOWNSHIPS are the largest subdivisions of land run out by the United States Surveyors. In the Governmental Surveys Township Lines are the first to be run, and a Township Corner is established every six miles and marked. This is called "Townshipping." After the Township Corners have been carefully located, the Section and Quarter Section Corners are established. Each Township is six miles square and contains 23,040 acres, or 36 square miles, as near as it is possible to make them. This, however, is frequently made impossible by: (1st) the presence of lakes and large streams; (2nd) by State boundaries not falling exactly on Township Lines; (3rd) by the convergence of Meridians or curvature of the earth's surface; and (4th) by inaccurate surveys.

Each Township, unless it is one of the exceptional cases referred to, is divided into 36 squares, which are called Sections. These Sections are intended to be one mile, or 320 rods, square and contain 640 acres of land. Sections are numbered consecutively from 1 to 36, as shown on Diagram 4. Beginning with Section 1 in the Northeast Corner, they run West to 6, then East to 12, then West to 18, and so on, back and forth, until they end with Section 36 in the Southeast Corner.

Diagram 4 shows a plat of a Township as it is divided and platted by the government surveyors. These Townships are called Government Townships or Congressional Townships, to distinguish them from Civil Townships or organized Townships, as frequently the lines of organized Townships do not conform to the Government Township lines.

SECTIONS OF LAND.

DIAGRAM 5 illustrates how a section may be subdivided, although the Diagram only gives a few of the many subdivisions into which a section may be divided. All Sections (except fractional Sections) are supposed to be 320 rods, or one mile, square and therefore contain 640 acres—a number easily divisible. Sections are subdivided into fractional parts to suit the convenience of the owners of the land. A half-section contains 320 acres; a quarter-section contains 160 acres; half of a quarter contains 80 acres, and quarter of a quarter contains 40 acres, and so on. Each piece of land is described according to the portion of the section which it embraces—as the Northeast quarter of Section 10; or the Southeast quarter of the Southeast quarter of Section 10. Diagram 5 shows how many of these subdivisions are platted, and also shows the plan of designating and describing them by initial letters as each parcel of land on the Diagram is marked with its description.

As has already been stated, all Sections (except Fractional Sections which are explained elsewhere) are supposed to contain 640 acres, and even though mistakes have been made in surveying, as is frequently the case, making sections larger or smaller than 640 acres, the Government recognizes no variation, but sells or grants each regular section as containing 640 acres "more or less."

The Government Surveyors are not required to subdivide sections by running lines within them, but they usually establish Quarter Posts on Section Lines on each side of a section at the points marked A. B. C. and D. on Diagram 5.

DIAGRAM 5.

FRACTIONAL PIECES OF LAND.

CONGRESSIONAL Townships vary considerably as to size and boundaries. Mistakes made in surveying and the fact that Meridians converge as they run North cause every Township to vary more or less from the 23,040 acres which a perfect Township would contain. See Diagram 4. In arranging a Township into Sections all the surplus or deficiency of land is given to, or taken from, the North and West tiers of Sections. In other words, all Sections in the Township are made full—640 acres—except those on the North and West, which are given all the land that is left after forming the other 25 Sections.

Diagram 4 illustrates how the surplus or deficiency is distributed and the Sections it affects. It will be seen that Sections 1, 2, 3, 4, 5, 6, 7, 18, 19, 30 and 31, are the "Fractional Sections," or the Sections which are affected if the Township overruns or falls short. Inside of these Fractional Sections, all of the surplus or deficiency of land (over or under 640 acres) is carried to the "forties" or "eighities" that touch the Township Line. These pieces of land are called "Fractional Forties" or "Fractional Eighities," as the case may be. Diagrams 4 and 6 show the manner of marking the acreage and outlining the boundaries of these "Fractions."

Diagram 6 illustrates how the surplus or deficiency of land inside of these Sections is distributed and which "forties" or "eighities" it affects. From this arrangement it will be seen that in any Section that touches the North or West Township Lines, the Southeast Quarter may be full—160 acres—while another quarter of the same Section may be much larger or smaller. Frequently these fractional "forties" or "eighities" are lotted as shown in Diagram 6. They are always described as fractional tracts of land, as the "fractional S. W. 1/4 of Section 6," etc. Of course those portions of these Sections which are not affected by these variations are described in the usual manner—as Southeast $1/4$ of Section 6. As a rule Townships are narrower at the North than at the South side. The Meridians of Longitude (which run North and South) converge as they run North and South from the Equator. They begin at the Equator with a definite width between them and gradually converge until they all meet at the poles. Now, as the Range lines are run North and South, it will at once be seen that the convergence of Meridians will cause every Congressional Township (North of the Equator) to be narrower at its North than at its South side, as stated. See Diagram 4. In addition to this fact, mistakes of measurement are constantly and almost unavoidably made in running both Township and Range lines, and if no new starting points were established the lines would become confused and unreliable, and the size and shape of Townships materially affected by the time the surveys had extended even a hundred miles from the Base Line and Principal Meridian. In order to correct the surveys and variations caused by the difference of latitude and straighten the lines, "Correction Lines" (or Guide Meridians and Standard Parallels) are established at frequent intervals, usually as follows: North of the Base Line a Correction Line is run East and West parallel with the Base Line, usually every twenty-four miles. South of the Base Line a Correction Line is usually established every thirty miles. Both East and West of the Principal Meridian "Correction Lines" are usually established every 48 miles. All Correction Lines are located by careful measurement, and the succeeding surveys are based upon them.

DIAGRAM 6.

PATRONS' BUSINESS DIRECTORY

—OF—

OAKLAND COUNTY, MICH.

EXPLANATION—In the township directories the following abbreviations are used: **s.** for section on which the home is located; **t.** for township; **p. o.** for postoffice address; **a.** with the accompanying figures, indicates the number of acres the party owns within the county.

PONTIAC.

Abstract, Real Estate, Loan and Insurance.

Oakland County Abstract Office.

CRAWFORD & CRAWFORD, Proprietors.

Successors to Webster & Crawford.

This office contains the only complete abstracts of all lands in Oakland county, including record of unpaid taxes, attachments, levies, liens, probate records, etc.

We have special facilities for accurate conveyancing and promptly attend to all the branches of real estate business, including legal business pertaining thereto. Accuracy and promptness our motto.

CORTRITE & MORELAND, 21 N. Saginaw St., real estate sold and exchanged. Personal property sold at auction.

We also handle a fine grade of carriages.

B. F. ELWOOD, Real Estate and Loans. Vice-President of Pontiac National Bank.

JAMES H. HARGER, Treadway Block, 53 N. Saginaw St. Abstractor, Real Estate Dealer. Founder of Oakland County Abstracts. Twenty years experience. Special agent to examine titles for P. O. & N. R. R. Co., 1883-4. Clerk in register's office 1870. Deputy Register of Deeds 1871-6. Register of Deeds 1877-80. Register of Probate 1885. Manager of Abstract books 1887-8.

F. J. STUART, Real Estate and Insurance; Money Loaned; Houses Rented. Also deals in Wood and Coal. Office 30 N. Saginaw Street.

H. H. & G. G. THATCHER, Fire Insurance. 32 N. Saginaw St.

Attorneys at Law.

BALDWIN, DRAPER & JACOKES (A. C. Baldwin, Chas. Draper, Jas. A. Jacokes). Attorneys, Counselors and Solicitors. Legal business attended to in all parts of the state. Office, 37 N. Saginaw street.

GEO. E. BEARDSLEE, Attorney at Law, Crofoot Block.

MARK S. BREWER, Attorney at Law, 41 N. Saginaw Street.

PETER B. BROMLEY, Attorney at Law, room 2, Davis Block.

SYLVESTER COLE, Crofoot Block. Legal business promptly attended to. Collections made and Money Loaned.

HOMER H. COLVIN, Attorney, Treadway Block.

DANIEL L. DAVIS, Davis Block, Law, Loans and Real Estate.

JAYNE & LYNCH, (D. D. Jayne, Detroit; James H. Lynch, Pontiac,) Attorneys. Offices, 20 McGraw Building, Detroit, and 26 N. Saginaw St., Pontiac.

R. J. LOUNSBURY, Crofoot Block, Law and Insurance.

MICHAEL F. LILLIS, Attorney at Law, Justice of the Peace, Crofoot Block.

A. L. MOORE, Attorney at Law, 37 N. Saginaw St.

JOHN H. PATTERSON, Attorney at Law, Probate office.

K. P. ROCKWELL, Attorney and Counselor at Law, 41 N. Saginaw Street.

JOSEPH E. SAWYER, Law, Real Estate and Collections, Crofoot Block.

GEORGE W. SMITH, Judge of Circuit Court, office over Pontiac National Bank.

SAMUEL W. SMITH, Lawyer, 41 N. Saginaw St.

JUNIUS TENEYCK, Attorney and Counselor at Law and Solicitor in Chancery, 53 N. Saginaw St.

ELMER R. WEBSTER, Law and Real Estate. Special attention given to examining titles and to all kinds of conveyancing. Also Secretary of People's Loan and Investment Company.

FREDERICK WIELAND, Attorney at Law and Solicitor in Chancery, Prosecuting Attorney for Oakland County. Room 12, Davis Block.

Banks, Loan and Investment Companies.

FIRST COMMERCIAL BANK, Capital, \$100,000; Surplus and Undivided Profits, \$8,000. Officers: A. Parker, President; Goodman Jacobs, Vice-President; F. G. Jacobs, Cashier. Directors, A. C. Baldwin, A. Parker, Chas. Dawson, G. Jacobs, C. M. Crofoot, C. G. Freeman and J. H. Patterson. Four per cent allowed on time deposits.

OAKLAND COUNTY SAVINGS BANK, Paid up Capital, \$50,000. B. G. Stout, President; Joshua Hill, Vice-President; D. H. Power, Cashier. Directors, Joshua Hill, Edward

C. Smith and H. F. Messinger. Four per cent. interest paid to depositors.

PONTIAC NATIONAL BANK, Capital, \$100,000. Surplus and Undivided Profits, \$21,000. William G. Hinman, President; B. F. Elwood, Vice-President; Albe Lull, Cashier. Directors: W. G. Hinman, B. F. Elwood, M. S. Brewer, T. N. Turk, E. Phelps, P. A. Hitchcock and A. Lull. Interest at the rate of four per cent. on time deposits.

PEOPLE'S LOAN AND INVESTMENT COMPANY, Pontiac, Mich., Capital Stock, \$300,000. Investment safe with good returns. Officers and Directors: Ferris S. Fitch, President; Franklin A. Crawford, 1st Vice-President; Homer Brooks, 2d Vice-President; Elmer R. Webster, Secretary; D. Judson Hammond, Treasurer; Homer H. Colvin, Attorney.

County Officers—1896.

Circuit Judge, George W. Smith; Clerk, Frederick Harris; Coroner, Chauncy Brace; Judge of Probate, Thomas L. Patterson; Prosecuting Attorney, Frederick Wieland; Register of Deeds, Wm. T. Mathews; School Commissioner, Harry H. Snowdon; Sheriff, J. K. Judd; Surveyor, Reuben Russell; Treasurer, H. F. Stone.

Hotels.

HOTEL HODGES, Thad A. Smith and Chas. Roe, Jr. proprietors. House newly furnished. Steam heat. Electric lights and all modern improvements. Corner of Saginaw and Pike streets.

HOTEL CLINTON, Newly Fitted and Furnished throughout. East side Saginaw street near river. C. G. Crofoot, proprietor.

NORTHERN HOTEL, Harvey Skidmore, owner. Free bus to and from all trains. First-class stabling in connection. This old and popular house has been thoroughly refitted. 91 N. Saginaw street.

ROSE HOUSE (Temperance Hotel). \$1.50 per day. Every thing neat and home-like. J. W. Ogle, proprietor. Free bus to and from all trains, also first-class stabling in connection. 12 Perry street.

Livery, Hack, Sale and Feed Stables.

N. E. DEUELL, proprietor of Pike Street Livery, Omnibus Hack and Baggage Line. Best of stock at all times.

GEORGE HICKS, 32-34 S. Saginaw street. Horses always on hand for sale. Carriages for pleasure parties and funerals on short notice. Also owner of 74 acres, section 23, Bloomfield township, on which there is a fine vineyard.

JOSEPH TOYNTON, "The Palace" Livery, Feed, Sale and Boarding Stable. Corner Saginaw and Andrews streets.

Merchants.

C. P. BELL, "Bell's Shoe House." Ladies' Misses' and Gentlemen's Fine Shoes and Slippers. 33 N. Saginaw street.

J. W. BIRD, Clothing and Merchant Tailoring, Gent's Furnishings, Hats and Caps. Opposite First Commercial Bank.

WALTER J. FISHER, Grocer, sells the Best Goods at the Lowest Prices. Everything guaranteed. Also makes a specialty of Real Estate.

C. G. FREEMAN, Produce Dealer. Grower and Shipper of Potatoes and Beans. Place of business near D. G. H. & M. Ry. tracks, south of depot.

C. H. GOING, proprietor "Great Corner Shoe Store," established in 1873. Dealer in Boots, Shoes and Rubbers. Corner Saginaw and Lawrence streets.

P. A. HITCHCOCK, dealer in Clothing, Gent's Furnishings, Hats, Caps, Robes, Blankets, etc. Fine Custom Tailoring Made a Specialty. 51-53 N. Saginaw street.

THE PONTIAC HARDWARE COMPANY, C. B. Pittman, President, Stoves, Hardware and Tinware, Sporting Goods, Gas Fitting and Plumbing, Agricultural Implements, Farming Tools, Carriages, Buggies and Sewer Pipe.

JOHN POUND, "The Bee Hive," dealer in Dry Goods, Carpets and Cloaks, 49 N. Saginaw street.

H. B. SEAGRAVE, General Hardware, Stoves, etc. Plumbing, Tinsmithing and Gas Fitting, 15 N. Saginaw St.

TURK BROS. (T. N. and W. G.,) dealers in Groceries, Crockery, Paints, Oils, Glass and Fine Seeds, 45-47 N. Saginaw street.

G. H. TURK, dealer in Clothing, Hats, Caps, Furnishing Goods, etc. Custom Work a Specialty. 44 N. Saginaw street, Clinton Hall Block.

WAITE BROS., ROBERTSON & Co. (Successors to J. S. Stockwell), dealers in Dry Goods, Dress Goods, Carpets, Cloaks, Jackets, Wraps, Notions, etc., 21 N. Saginaw St. **Manufacturers.**

D. C. INGOLDSBY & SON, dealers in Agricultural Implements, Power and Pumping Windmills. Windmill Supplies a Specialty.

WM. H. OSMUN JR., Manufacturer of Brick, Tile and Lumber, also Contractor and Builder. Residence, corner Auburn Ave. and Sanderson street.
